

**Healthy Integrator** allows Insurance companies to connect their numerous systems to the Health Exchange by supporting X12 (834, 820 etc.), EDI, HL7, Fixed Length, CSV, XML out of the box. It is designed to rapidly integrate systems by using existing and proven solutions. **Mule ESB** acts as the backbone and connects to different systems using SFTP, HTTP, JMS, SMTP, JDBC etc. **ActiveMQ** brings in reliability, speed and asynchronous message processing. **Mirth Connect** and **Pentaho Kettle** act as data transformers and help adapting to the needs of the different trading partners. **Pentaho Dashboard** provides a live view of the transactions and supports tracking, monitoring and SLAs.

With over 3200 production deployments, Mule is the world's most widely used Enterprise Service Bus. Mule ESB provides a platform that simplifies the integration of applications and technologies, both on-premise and in the cloud.

Mirth Connect is the Swiss Army knife healthcare integration engine. Mirth provides the necessary tools for developing, testing, deploying, and monitoring interfaces.

Apache ActiveMQ™ is the most popular and powerful open source messaging and Integration Patterns server.

Pentaho Data Integration delivers powerful extract, transform and load (ETL) capabilities using an intuitive and rich graphical design environment that enables users to do exactly what most skilled code developers can accomplish – in a fraction of the time.
